Semi-automatic unit for filling powder extinguishers

with electronic weight control

System designed and built to be easily transported on vans and mini vans. It is a compact and versatile machine, with semi-automatic operation. With it it is possible to fill powder extinguisher tanks from big bags or sachets, having control over the weight. In fact, the unit is equipped with an automatic weight control system with filling detachment when the weight is reached, imposed by the display placed in a comfortable and ergonomic position on the electrical panel. The unit is equipped with settable weight memories, the powder recovered at each filling is deposited in a tank which is automatically emptied, at regular intervals, by the machinery.

The use of this machinery offers considerable time savings in filling powder extinguishers, and appreciable cleanliness in the environment.

GENERAL INFORMATION:

- Integrated load cell;
- Programmable and customizable memories;
- Possibility of loading from big-bags or bags using a dipstick;
- Automatic recovery phase engagement No. of cycles (settable);
- Filling speed of a 6 kg fire extinguisher approximately every 70 sec;
- Electrical panel equipped with PLC and comfortable and intuitive touch screen;
- Small dimensions, this makes it a practical device intended for maintenance workers;
- Integrated manual vice to facilitate the valve unscrewing/ tightening process

TECHNICAL CHARACTERISTICS:

- Power supply: 230V + compressed air 8 bar;
- Dimension: LxPxH 800x600x1000 mm;
- Noisy: 67 dB;
- Weight: 65 Kg;
- System: Single phase + Earth;
- Absorption: 0,5 KW.
