## 2873 / 2873-1 / 2873-2 Unit for dosing and mixing foams for portable fire extinguishers

### DESCRIPTION:

Completely made of AISI304 stainless steel, it is a machine for mixing and dosing the quantity of foam to be put into a fire extinguisher. Its peculiarity is the ability to MIX PURE WATER AND FOAM FOR THE CREATION OF EXTINGUISHING COMPOUNDS, WITH A MAXIMUM OF FOUR "INGREDIENTS", INCLUDING WATER, SIMULTANEOUSLY. THIS ALLOWS A HUGE ECONOMIC ADVANTAGE TO THOSE WHO USE IT.

Added to this is the possibility of also using premixed products.

All this makes for a complete and rapid machine for the production or overhaul of foam-based fire protection systems. Simple and intuitive controls thanks to a stainless steel touch screen console.

The available versions are:

#### Code: 2873-2

- Unit for mixing and dosing two products. Water plus foam or two premixed products.

#### Codice: 2873-1

- Unit for mixing and dosing three products. Water plus two foams, water plus foam and antifreeze, three premixed products.

#### Codice : 2873

- Unit for mixing and dosing four products. Water plus three foams or water plus two foams and antifreeze, four premixed products.

### GENERAL INFORMATION:

- Electric head positioning (up-down);
- It allows the insertion of 40 types of foams and 60 mixtures into the memory;
- Possibility of loading with premixed product;
- Speed of filling the 6lt fire extinguisher with premixed product, approximately 70 seconds, depending on the product;
- Electrical panel equipped with PLC and comfortable and intuitive touch screen;
- Equipped with system washing phase and subsequent restoration;
- Suction of components from cans or cisterns using self-priming pneumatic pumps;
- Easily washable spill collection tank.

### TECHNICAL INFORMATION:

- Dimension: LxPxH 800x600x2100mm;
- Weight: (depending on the model) 105-140Kg;
- Frame: stainless steel.
