The D.Lgs: 81 date 09 April 2008 with Art. 45 re-confirms the validity of D.M. 388 date 15 July 2003

EXTRACTED FROM "GAZZETTA UFFICIALE"
General series No. 27 of 3 February 2004
Department of Health 15 July 2003 No. 388
Regolation laying down provisions about the company first aid, in accordance with the art. 15 comma 3, of the legislative decree 19 September 1994. No. 626, and subsequent changes.

Art. 1 - Classification of companies
1. Companies, otherwise production units, are classified bearing in mind what kind of activity they carry out, the number of workers and the risk factors. There are 3 groups:
A I) Companies or production units with an industrial activity..., thermal power stations..., mining companies, etc.
II) Companies or production units with more than 5 workers...linked to INAIL tariff groups.
III) Companies or production units with more than 5 workers ...of the agricultural sector.
B Companies or production units with 3 or more workers that are not included in group A
C Companies or production units with less than 3 workers that are not included in group A

Art. 2 - First aid organization
1. In companies or production units of group A and B, the employer must ensure the following equipement:
a) First aid kit, in every workplace, ... containing the minimum equipment indicated in Attached 1, that is part of the present decree, ... and which constantly have to be assured of its completeness and of the correct status of the aids that it contains.

2. In companies or production units of group C, the employer must ensure the following equipment:
a) Briefcase for medical treatment, in every workplace, containing the minimum equipment indicated in Attached 2, that is part of the present decree, and which constantly have to be assured of its completeness and of the correct status of the aids that it contains.

5. In companies or production units which have workers that provide at their own activity in isolated places, different than the headquarters or the production unit, the employer must provide them the medical pack refferred to in Attached 2.

Art. 5 - Abrogations
The Ministerial Decree of 2 July 1958 is abrogate.

Art. 6 - Entry into force
The present Decree enters into force 6 months after the publication in the "Gazzetta ufficiale della Repubblica Italiana" Roma, 15 July 2003.

Penalities
The employer and the director are punished with detention from 3 to 6 months or with financial penality from 3 to 8 millons lira for the violation of the rights ... No. 15 comma 1 (measures required in first-aid subject and emergency matter in companies i.e. production units).

ATTACHED 1

MINIMUM EQUIPMENT OF THE FIRST AID KIT:

· Single-use sterile gloves (5 pairs) - GUA168
· Flacon of cutaneous povidone-iodine solution (10 % of iodine) (1 liter) - JOD002
·0 Flacon of physiological saline (sodium chloride 0,9 %) 500 ml (3) - SOL004
· Compressed and sterile surgical gauze 10 x 10 in single envelopes (10) - GAZ111
· Compressed and sterile surgical gauze 18 x 40 in single envelopes (2) - GAZ194
· Single-use sterile surgical tweezers (2) - PIN110
· Package of surgical hydrophilic cotton (1) - COT279
· Package of sticking plasters of different measures ready-to-use (2) - CER075
· Roll of sticking plasters high 2,5 cm (2) - CER231
· Mud-flaps visor - MAS205
· A pair of scissors - FOR199
· Tourniquets (3) - LAC190
· Instant Instant ice packs (2) - KWK044
· Single-use bag for the sanitary waste collection (2) - SAC052
· Instructions on how to use defenses and how to give first-aid - FOG045
· Single-use sterile surgical drape (2) - TEL025
· Package of medium elastic net (1) - RET100
· Thermometer (1) - TER167
·Apparatus used for measuring the arterial pressure - SFI240

ATTACHED 2

MINIMUM EQUIPMENT OF THE FIRST-AID KIT

· Single-use sterile gloves (2 pairs) - GUA168
· Flacon of cutaneous povidone-iodine solution (10% of iodine) 125 ml (1) - JOD003
· Flacon of physiological saline (sodium chloride 0,9%) 250 ml (1) - SOL002
· Compressed and sterile surgical gauze 10 x 10 in single envelopes (3) - GAZ111
· Compressed and sterile surgical gauze 18 x 40 in single envelopes (1) - GAZ194
· Single-use sterile surgical tweezers (1) - PIN110
· Package of surgical hydrophilic cotton (1) - COT281
· Package of ready-to-use sticking plasters of different measures (1) - CER075
· Roll of sticking plasters high 2,5 cm (1) - CER231
· Roll of fringed bandage high 10 cm (1) - BEN223
· A pair of scissors - FOR078
· Tourniquets (1) - LAC190
· Instant Instant ice packs (1) - KWK044
· Single-use bag for the sanitary waste collection (1) - SAC052
· Instructions on how to use defenses and to how give first-aid - FOG045

In this catalogue are explained different type of first-aid and resuscitation, trying to serve as better differnt necessities of the final user.

The current Ministerial Decree in effect of No. 388 of 15 July 2003, that define minimum equipment for compa nies, is divided in 2 contents:

ATTACHED 1 for companies of group A and group B and, in any case, with more than 3 workers

ATTACHED 2 for companies with less than 3 workers that are not included in group A and for workers that are working in different places than the headquarters.

In the pages of this catalogue you can find different models, including first-aid kit withe content defined as “BASE” (minimun equipment required) and a kit defined as “PLUS”, which is improved with products of isefulness recognition and higher consumption.

For the sake of clarity, all kits that are prepared with contents according the general Ministerial Decree, are accompained by the related certificate with Law references, the minimum expected equipment and instruction of use.

Photos and contents could suffer variations and alteratrations without notice period.

Extract of I new D.M. 10.01.2015 in force since 01/18/2016

"BUFFET" NEUTRAL pH WASHING-STATION

CODE	PRICE
CPS211	€ 65,33

HOW TO USE:

ITO OPEN THE DROP, THE BUFFET DROP AND THE DUAL DROP, YOU JUST HAVE TO PULL THE COVER SLIGHTLY BACK AND LET IT DROP DOWNWARD.

THEN PULL OUT THE BOTTLE AND UNSCREW THE CAP.

IN THIS WAY YOU BROKE THE SEAL AND THE BOTTLE IS READY FOR THE UTILISATION.

THA ANATOMICAL CAP ALLOWS YOU TO DIRECT THE LIQUID, OBTAINING THUS AN EFFICENT EYEWASH WITHOUT WASTEFULNESS.

AT THE END OF THE INTERVENTION, THE LITTLE MIRROR MOUNTED INSIDE THE WASHING-STATION, COULD BE AN USEFUL ACCESSORY TO MAKE AN INITIAL DAMAGE ASSESSMENT.

THIS PRODUCT IS RECOMMENDED FOR ALL THE PLACES IN WHICH THE POSSIBILITY OF REALIZING AN EMRGENCY EYEWASH EXIST.

"DUAL DROP" OCULAR WASHING-STATION

Emergency ocular washing-station. The station is thermoformed, with a frontal transparent part and closure resistant to dust. It is equipped with a little mirror and it is supplied with brackets and screws for a potential wall application. The bottles are equipped with a preassembled ocular cap for a quick use.

ALLUMINIUM/SPONGE SPLINTS

Splints for compound fractures made of alluminium and sponge. They can be broken and shaped. Ideal to immobilize small fractures.

AVAILABLE IN 3 SIZES

CODE	SIZES	PRICE
STE118	46x1 cm	€ 3,27
STE116	46x1,9 cm	€ 3,27
STE119	46x2,5 cm	€ 3,27

"BOSTON" SPLINT

CODE	PRICE
STE114	€ 28,00

Shapable splint for fractures. It can be washed and disinfected.
Radiolucent and covered with non-toxic material.

Dim. cm92x11

Made of polyurethane foam and covered with waterproof material. It allows a quick and safe immobilization of the injured's head. Accessory recommended for atraumatic and spinal stretchers.

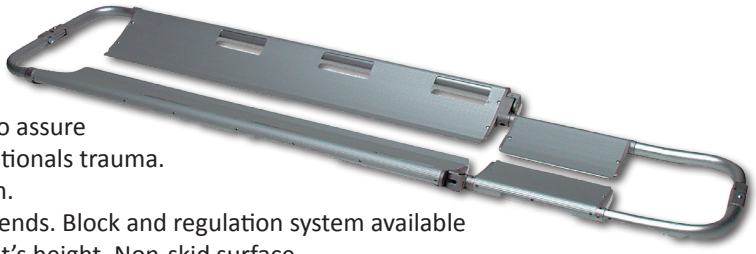

CODE	PRICE
FER001	€ 186,67

BASIC HEAD IMMOBILIZER

ATRAUMATIC STRETCHER

IN ACCORDANCE WITH LAW EN1865

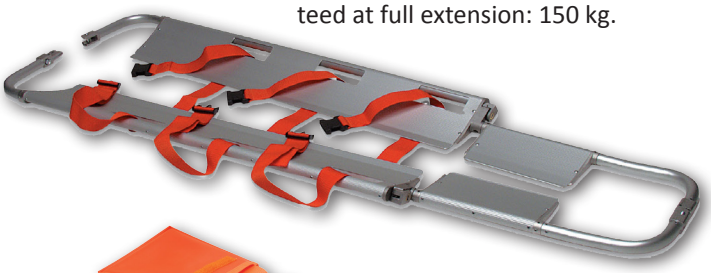

Indispensable stretcher in cases where it is necessary to assure the immobilization of the injured in order to avoid additionals trauma.
Entirely built with profiles made of anodized aluminium.
Supplied with opening/closing security system at both ends. Block and regulation system available at different lengths to adapt the stretcher to the patient's height. Non-skid surface.
Tests effectuated to guarantee the rated carrying capacity of 150 kg.
Provided with a set of 3 safety belts.

Dim. opened 205x44 cm
Dim. closed 165x44 cm
Dim. folded 117x44 cm
Weight 9 kg

"ROLLY" STRETCHER FOR CONFINATED SPACES

Rollable stretcher, designed to be ideal for first-aid needs in confinated spaces.
It is a an extremely flexible life-saving system that can be used whent it is required the evacuation and transportation of the patient in difficult climatic and morphological circumstances, and it is necessary a quick rescue.
Main features:
Resistant to all environmental conditions, body fluids and blood. The specific material employed allows to wash the stretcher without risks. Infact it does not absorb any organic or biological fluid. Safety transport of the injured. The high resistance of the materials protects the injured during the tranport operations and it offers a great support. Easy to use and prepare. The utilisation of belts, ribbons and buckles, painted in different colors, prevents potential mistakes in the preparation, and speeds up the usage.
It can be used both in vertical and horizontal, thanks to the specific holder.
Light and compact. The lightness of the material, the possibility to be rolled and the compact transporting bag, guarantee a practical transport and storage.

2

Technical features:
Stretcher material: PE
Handles material: Nylon.
Carrying capacity: 150 kg.
Weight: 7,3 kg
Hanger Weight: 780 g

GURNEY CHAIR - 2 WHEELS

CODE	PRICE
SED001	€ 840,00

Essential iteam for the transport of patients in the most uncomfortable places such as tairs, corridors and lifts, where the stretcher cannot pass. Equipped with 4 handles (2 of them frontal) to ameliorate the transport in every situation. Of minimal obstruction in folded position. Made of light aluminium with orange nylon waterproff cloth, 2 quick lock belts to immobilize the patient, 2 fixed wheels one of them supplied with a block to ameliorate the transport on smooth surfaces.

OPENED: Length 71 cm - Width cm 52
Height 91 cm - Weight 8,50 kg - Carrying capacity 150 kg

GURNEY CHAIR - 4 WHEELS

CODE	PRICE
SED004	€ 980,00

Essential iteam for the transport of patients in the most uncomfortable places such as tairs, corridors and lifts, where the stretcher cannot pass. Equipped with 4 handles (2 of them frontal). Of minimal obstruction in folded position. Made of light aluminium with orange nylon waterproff cloth, equipped with glovebox pocket behind the backrest. Automatic safety block, 2 quick lock belts to immobilize the patient, 4 fixed wheels, 2 of them supplied with wheel-lock.

OPENED: Height 91 cm - Length 56 cm
Deepth 71 cm - Weight 8,50 kg - Carrying capacity 150 kg

"SICUR TREK" EMERGENCY BLANKET

All-purpose blanket made of poliprophylenic fibre. One side of Fralon and the other of metallic polyethylene film, fused together. The blanket is washable, waterproof and unassailable by mildew and microorganisms.
Depending on the side used, the blanket protects from heat or cold. It has a wide range of uses: camping, excursions, to keep in the car as an emergency blanket. Etc...

CODE	PRICE
COP210	€ 77,00

Dim. 200x150 cm

"GOLDEN/SILVER" EMERGENCY BLANKET

Blanket made of polyester and covered in golden/silver aluminium.

Silver: protects from heat.
Golden: protects from cold.

CODE	PRICE
COP216	€ 2,80

Dim. 201x160 cm

SELF-LOADING STRETCHER

Self-loading stretcher, almost entirely made of welded iron, painted in power coating, that makes the stretcher extremely reliable and strong in every situation.
Provided with 4 wheels of 200 mm diameter, 2 of them fixed and with brake and 2 turning wheels made of a soft material which allows a wider comfort on rambling surfaces.
The different inclination of the legs allows a better stability during the use.

SUPPLIED WITH MAT
AND SAFETY BELTS

Maximum charge height 64 cm
Minimum charge height 50 cm
Wide height 28 cm
Weight 40 kg
Carrying capacity 160 kg

- Rigid loading bed in reinforced thermoplastic material
- Reclining seatback (0° -80°) activated by a gas piston. Can be blocked in each position
- Flappable sideboards
- Vertical legs safeguarded with plastic bumbers
- Turning wheels with self-centrating system to allow the stretcher's collocation on the ambulance avoiding to turn the wheels manually
- Frontal adjustable landing gear useful to allow to adapt the stretcher height of carriage depending on the type of ambulance.

SAMARITAN PAD 350P SEMIAUTOMATIC DEFIBRILLATOR

Light and compact
The smallest semiautomatic defibrillator on the market.

Easy to use
The simultaneous presence of visual and vocal commands (ex.“Apply the electrodes”, “Do not tuch the patient” or “The patient can be touch without risks now”) guide the user during all the first-aid process, even in cases of a noisy environment or rescuer which suffer from “Sensorineural hearing loss”.
Furthermore, it can be also used directly from its restraint bag, significantly reducing the device’s starting time.

Biphasic wave SCOPE
This biphasic wave allows the defibrillator (in comparison with the other devices on the market) to manage bigger impedance fringes, assuring performances never seen before: the best life-saving therapy ever, with the lowest level of collateral damages for the cardiac cells.

Resistant
The shelter indicator IP56 is the highest shelter indicator available on the market, it assure a complete protection against the penetration of dust and water jets from all the directions. Rain, water jets, saltiness, mud, humidity and dirt, do not affect the performances of the defibrillator.

“Pad-Pak” cartridge
It allows to have only one expiaration date to check, unlike the other brand’s defibrillators. After the usage or after 4 years from the date of built, it is sufficent to substitute the “Pad-Pak” cartridge for an immediate reactivation of the functioning of the device.

Warranty: 10 years - **Weight:** 1,1 kg.

Case - **Insurance covering**

"LIFE LINE AED" SEMIAUTOMATIC DEFIBRILLATOR

CODE	VERSION	PRICE
DEF001	STANDARD	€ 5.226,66
DEF000	TRAINER VERSION	€ 3.201,33

Easy and innovative
The "AED Lifeline" combines advanced technology solutions with a great immediacy and clarity of use to assure a safe and efficent emergency intervention, even in presence of non-medical staff.
Diagnostic quality
The algorithms' analysis of the heart rhythm are so much reliable and certain that they fully satisfy even the more strict requirements demanded from the US and European Standards (American Heart Association, European Resuscitation Council.
Wave's shape
The biphasic truncated exponential wave assures a verified effectiveness; this wave is the one of which more clinical datas are available.
Therapy personalization
The adult and pediatric procedures and the impedance compensation during the electric shock allow a complete adaptation of the therapy to the patient.
Usable in extreme conditions
The "AED Lifeline" has passed the most extreme tests of: temperature, humidity, vibration, fall, waterproof, immunity to electromagnetic interferences and dust and water resistance. It is proved to be the most appropiate semiautomatic defibrillator to be used and maintained in every environment conditions.

"LIFE LINE AED" DEFIBRILLATOR BAG

Bag for "LifeLine AED" semiautomatic external defibrillator. Supplied with high visibility reflective strap, handle and shoulder strap for a safe and easy transport. External pocket and zip latch.

"IPAD CU-SP1" DEFIBRILLATOR

The CU-SP 1 is a next-gen defibrillator with innovative features:

Automatic volume regulation: Cu-Sp1 is able to self-regulate its volume depending on the environment noises.

Defibrillator pre-connected ready-to-use piasters : Cu-Sp1 is equipped with pre-connected piasters placed in an appropiate compartment under the defibrillator. This assure the defibrillator to be ready-yo-use in the shortest time possible.
Furthermore, the device is provided with an exclusive technology which is able to make a detailed control of the piasters' conditions. The frontal part of the defibrillator, in fact, hosts a changing-color light indicator which change is color 3 months before the expiration date of the piasters and when these expires definitively. This precise indication, permits the acquisition of new piasters in good time.

CPR detector: The "iPad CU-SP1C" defibrillator is able to detect if the CPR manoeuvre has already been practiced or not. If it has not been practiced yet, it urges the operator to do it; otherwise it encourages the operator to continue his work, guiding him during the operation.

CODE	MODEL	PRICE

CONTENTS	
1	Instruction
1	Disinfectant solution
2	"Visi Resusci" Manikin face (1 extra)
1	Transport/Training platform bag
2	Respiratory tracts "Little Anne" (1 extra)

The "Little Anne" manikin has been designed to provide an economic alternative in the RCP training programs (Cardiopulmonary Reannimation). Thanks to its affordable price, several manikins can be used during the lessons, increasing the level of active partecipation and practice of the students.
Each "Little Anne" manikin, simulates an adult body anatomically and physiologically normal, and it is designed for the realistic teaching of basic reanimation techniques and in particular for the cardiopulmonary reanimation.
Natural respiratory traits obstruction. Realistic facial features and movable jaw. Simulation of human ventilation and compression complication. Raising and falling of the chest during the ventilations. Realistic reference points to individuate the compression point. Acoustic signal confirmation of the well-executed compressions.
Transporting bag convertible in training platform.

"BETA" KIT

Nylon cross body bag with internal pocket and zip latch.

First-aid kit conteining products for an effective first-reanimation.
Ideal for dental offices, sports clubs, industrial companies, emergency vehicles, etc...

Note for the Oxygen tank:
The tank provided is empty because the oxygen is considered a medicine and it has to be bought in a pharmacy by the final user. The latter has to communicate the VAT identification number or the social security number at the moment of the first charge. The code will be carved on the appropriate cylinder's metal ring.
